this volume looks at sustainable protection and sustainable use of cultural and natural heritage particularly in view of the current challenges of the 21st century for more than 40 years the world heritage convention has regulated the protection of the cultural and natural heritage of humankind particularly in that heritage shall be protected if it is threatened by modern development the international community has also adopted sustainability and sustainable

development as objectives to facilitate the protection of cultural and natural heritage sustainable heritage protection and use must therefore be preserved in the face of the global challenges it faces and must be perceived in terms of societal political and corresponding economic paradigms

industrial capitalism is broken the signs which transcend national ideologies are everywhere climate change ecological overshoot financial exhaustion fraying social safety nets corporate fraud government deceit civic unrest terrorism and war but there is hope this book tells how transformation is taking root in the corporate world the last place many of us would look for solutions the book tells the stories of seven exceptional companies their shared secret is a new mental model of the firm that is the virtual opposite of industrial capitalism each company if not already a household name is a significant player within their industry and crucially has outperformed their competitors lessons can be learned it works like this instead of modeling themselves on the assumed efficiency of machines a thought process that emerged during the industrial age these firms model themselves on living systems firms with open ethical inclusive traditions where employees have a voice and a stake in what happens have a distinct advantage over traditionally managed companies where most decisions are made at the top understanding that everything of value ultimately arises from life they place a higher value on living assets people and nature than they do on non living capital assets the energy they invest in stewarding those assets a practice described in the book as living asset stewardship las is transformative

once termed the world s largest military museum the chinese military has made enormous progress over the past twenty years with skyrocketing military budgets and new technology china s tanks aircraft destroyers and missile capabilities are becoming comparable to those of the united states if these trends continue how powerful will the chinese military be in the future will its capabilities soon rival or surpass those of the united states the most comprehensive study of its kind this book provides a detailed assessment of china s military capabilities in 2000 and 2010 with projections for 2020 it is the first of its kind in outlining a rigorous theoretically and empirically grounded framework for assessing military capability based on not just weaponry but also doctrine training equipment and organizational structure this framework provides not only the most accurate assessment of china s military to date but an important new tool in the study of military history

cultural heritage law and its response to human rights principles and practice has gained renewed prominence on the international agenda the recent conflicts in syria and mali china s use of shipwreck sites and underwater cultural heritage to make territorial claims and the cultural identities of nations post conflict highlight this field as an emerging global focus in addition it has become a forum for the configuration and contestation of cultural heritage rights and the broader politics of international law the manifestation of tensions between heritage and human rights are explored in this volume in particular in relation to heritage and rights in collaboration and in conflict and heritage as a tool for rights advocacy this volume also explores these issues from a distinctively legal standpoint considering the extent to which the legal tools of international human rights law facilitate or hinder heritage protection covering a

range of issues across africa asia europe latin america and australia this volume will be of interest to people working in human rights heritage studies cultural heritage management and identity politics around the world this book fills an important gap in the literature on heritage and rights and in particular human rights law with articles from leading experts addressing the legal human rights dimensions of cultural heritage protection it makes a significant contribution to debates over issues such as why should we safeguard heritage and for whom and what is the relationship between heritage safeguarding and protecting human rights these are deep questions of profound significance to individuals communities and even nations around the world and are of increasing urgency today it critically analyses the relationship between heritage and human rights that can be potentially pernicious as well as mutually reinforcing placing this analysis within the wider context and with a broad geographical scope with examinations of the heritage rights relationship in southeast asia cambodia china and sub saharan africa dr janet blake associate professor in law shahid beheshti university tehran traversing the destruction of mausoleums in timbuktu to war crimes trial by the international criminal court heritage culture and rights explores the crucial links between human rights and the protection of cultural heritage the essays are accessible to all viewing the destruction of cultural heritage as a breach of human dignity and identity unputdownable professor gillian triggs president of the australian human rights commission this collection of essays by leading scholars though primarily australian in origin is universal in orientation ranging from a broad survey of the applicable laws of armed conflict to a detailed consideration of urban design in southeast asia the essays offer significant insights into the relationship between the protection and use of cultural heritage on one hand and fundamental human rights on the other ultimately the mutual reinforcement of the two disciplines of law prevails over carefully acknowledged tensions between them readers at all levels of expertise will find the book of great interest professor james nafziger thomas b stoel professor of law and director of international programs at the willamette university college of law

latin america and the caribbean managed to reduce the number of undernourished by 20 million compared to the year 2000 however 2018 marks the fourth consecutive year in which hunger shows a continuous increases moderate or severe food insecurity in latin america increased considerably this increase caused more than 32 million people to join the almost 155 million who lived in food insecurity in the region in 2014 2016 the region has shown significant progress in reducing child malnutrition and it is significantly distant and below the global prevalence of malnutrition in girls and boys however malnutrition due to excessive weight in the region is one of the highest in the world and it continues to increase this year the regional overview of food security and nutrition in latin america and the caribbean focuses on food environments and describes some of the main policies that the countries of latin america and the caribbean are developing to face the different forms of malnutrition

this book stands as the full body of scholarly work on western theories of social sciences the book contents three chapters the first part gives the overall scenario of theories the second part provides the pathway to research destination the research method and the third and final part is the destination of the substantive field of study and the roles of international organizations on

social political economic environmental regimes creation as well as to other social and development functions of international organizations sociology examines the social actors activities in society and social problems western scholars have developed many social theories which address the underlying causes such as social conflicts and inequalities and many formal and informal social organizations are involved to minimize the challenges of inequalities the study of social organizations is a relatively new phenomenon in sociology broadly its historical root can be traced from greek civilization plato aristotle and it has mostly flourished since the enlightenment era however empirical studies show that the scientific study of organizations began only from the 19th and 20th century among the scholars of these centuries the contributions of karl marx ferdinand tönnies Émile durkheim ludwig gumplovicz vilfredo pareto max weber and talcott parsons are considered as pillars of sociology this book intends to answer the broad and major questions of theories methods and the international organization studies in social sciences particularly in sociology and to provide the basic concepts of social theories application of methods in research qualitative and elaborate the factual reality why study of international organization is also subject of sociological study the book presents the perspectives of organizational sociology in way that scholarly readers can see the linkages political sciences sociology and slightly economic in addressing the roles and issues of the international organizations

commercial development of energy from renewables and nuclear is critical to long term industry and environmental goals however it will take time for them to economically compete with existing fossil fuel energy resources and their infrastructures gas fuels play an important role during and beyond this transition away from fossil fuel dominance to a balanced approach to fossil nuclear and renewable energies chemical energy from natural and synthetic gas illustrates this point by examining the many roles of natural and synthetic gas in the energy and fuel industry addressing it as both a transition and end game fuel the book describes various types of gaseous fuels and how are they are recovered purified and converted to liquid fuels and electricity generation and used for other static and mobile applications it emphasizes methane syngas and hydrogen as fuels although other volatile hydrocarbons are considered it also covers storage and transportation infrastructure for natural gas and hydrogen and methods and processes for cleaning and reforming synthetic gas the book also deals applications such as the use of natural gas in power production in power plants engines turbines and vehicle needs presents a unified and collective look at gas in the energy and fuel industry addressing it as both a transition and end game fuel emphasizes methane syngas and hydrogen as fuels covers gas storage and transport infrastructure discusses thermal gasification gas reforming processing purification and upgrading describes biogas and bio hydrogen production deals with the use of natural gas in power production in power plants engines turbines and vehicle needs
